IT STAFF, PROGRAMMER, WEB DEVELOPER

Dynamic Innovation Support Engineer and Full-Stack Developer with over 3 years of experience in system optimization, network monitoring, and software management. An expert in PHP, with a proven track record of developing enterprise-level web solutions like the Division of City Schools - Manila website. Skilled in maintaining high-performance infrastructures using PRTG and Winbox while delivering technical support for global applications. Recognized for bridging the gap between hardware reliability and modern software development to drive operational productivity

WORK EXPERIENCE

Transcom Worldwide (Philippines), Inc. 02/2025 - Present

Innovation Support Engineer • Full-time Silver City 5, Office Lane, Ortigas East, Brgy. Ugong, Pasig City

- Delivers first-line technical and process-oriented support for internally developed global applications.
- Manages Enterprise Content Management Systems (CMS), including content publishing and troubleshooting for global administrators.
- Drafts and maintains technical instructional guides for both new and existing administrators to standardize system management and troubleshooting workflows.

Whiterain Digital Technologies Inc. 05/2024 - 12/2024

IT Support Officer • Full-time Makati City

- Enhanced system efficiency and operational productivity by resolving complex technical issues across office computer systems.
- Optimized office-wide internet connectivity and traffic flow using monitoring tools like PRTG, Cacti, and Pingplotter.
- Maintained software lifecycle and security by ensuring all office-wide applications remained updated.

Division of City Schools - Manila 03/2023 - 05/2024

Programmer/ ICT Staff • Full-time Manila

- Developed and launched the manila.deped.gov.ph website as of March 2023 - June 2024, serving as the central digital hub for the community.
- Established a comprehensive LAN connection across the Division Office, significantly improving network reliability and internet efficiency.
- Reduced interdepartmental communication gaps by streamlining the PC troubleshooting process.
- Utilized Winbox for advanced bandwidth management and network monitoring.
